The Forum is subdivided in sections for better readability and management:

- RASOR General Discussion
- RASOR case studies
 - Global case study
 - Northern Italy case study
 - Rotterdam area case study
 - Haiti case study
 - Santorini case study
- RASOR Toolbox

The forum is hosted also in the Environmental computing forum at www.envcomp.eu for more visibility and in order to involve more users in the discussion.

At the time of this revision the User Forum has been left almost unutilized. The main reason for that is that this has been conceived as a platform for exchanging between partners and core users on the platform implementation on the case studies. The platform has been presented in its alpha version at the user WS and therefore was not available till now, same many of data and models over the case studies. Now that the platform has been shared with the Core Users the forum is expected to come alive; and as a consequence also the one hosted in the environmental computing portal will follow.

Conclusions/Implications for RASOR

The forum can be a useful tool for the RASOR community. The second part of the project will be dedicated to its proper activation and use.
